

Overview

NeoCrumb offers compounding and formulary expertise to develop alloy systems using diverse polymeric ingredients to achieve the physical traits required to replace existing materials.

We are a customer-driven service business that is dedicated to delivering compounds with unique characteristics that are tailored to a company's specific needs.

Leadership

Daniel Johnson, CEO and Board Chairman

Alan Oliver, President

Paul Larson, Chief Financial Officer

Bill Schreiber, Chief Technology Officer

Bob Schreiber, Technical Service Mgr.

Value of a Partnership

- Improved processes and production methodology
- Access to innovative product lines & technologies
- Acceleration of product development and launch
- Advanced product performance and sustainability
- Brand distinction and better competitive positioning
- Market expansion and diversification

Licensing Opportunity

- Contact us to discuss a business alliance
- Enter into a licensing option agreement
- Validate technology during option agreement term
- Execute official licensing agreement

Profile

Recycled MRP (Micronized Rubber Powder), made from end-of-life tires, is a leading innovative material transforming various industries. This versatile material can be used in a wide range of applications, from automotive parts to consumer goods, providing excellent durability and performance.

Combining sustainable polymers and recycled MRP in the product lineup offers several advantages.

Market Differentiation

Product

NeoCrumb products are made from sustainable engineered polymers and formulated for the precise requirements of the customer.

The PolyCrumb Series is a replacement for polyolefins and thermoplastic elastomers used in the plastic extrusion and injection molding industries.

Industries & Applications

- Automotive & Trucking
- Building & Construction
- Agriculture, Drainage & Dunnage
- High Voltage, Sound & Thermal Insulation
- Trash Containers, Storage, Pallets & Bins
- Seals, Piping, Cables & Wires, Electrical Parts
- Floor Mats, Splash Guards & Mud Flaps
- Injection & Blow Molded Applications
